## STRANGE FORGED STEEL SPOOLS

Strange spools are forged in Strange-designed tooling from chromoly steel. These forgings are machined on all critical surfaces by computer controlled lathes. Mounting holes are drilled and axle splines are precision broached before heat treating. After heat treating, bearing and gear mounting areas are finish ground to precise tolerances.

### STRANGE EVOLUTION BRAKE KITS

Evolution Brake kits feature high heat and corrosion resistant stainless steel lightweight scalloped Dynamic Drive Mount (DDM) rotors and billet aluminum hats secured by an internal Spirolox for reducing rotating weight and allowing for thermal expansion. This will drastically reduce warping, coning, and cracking. These kits also feature four piston Billet Evolution 4 Calipers optimized and field-tested to improve piston retraction, pedal feel, and stiffness resulting in improved pad wear and exemplary braking efficiency.

# BRAKE KITS & COMPONENTS

## TBM DISC BRAKES

TBM Brakes offer one of the lightest and highest performing brake setups on the market. These brakes have been proven in every realm of drag racing from Top Fuel Dragsters to Hot Rod Drag Week and everything in between. TBM's revolutionary design offers lower drag and friction than most competitors. Lower rolling resistance means quicker ET, longer brake pad life, and better overall performance. TBM Brakes are quickly becoming the winning edge in brake system design.

# STEEL TUBING & ROD ENDS

## TUBING & PLATE

A.R.T. purchases steel in high-volume contract orders which allows us to specify certain mills as the source of our tubing. A.R.T. does not stock material melted or produced from Asian sources. All steel tubing is tracked by heat batch and carries certifications for alloy, grade and mechanical properties.

*All tubing must be prepaid and is not returnable.*

#017628

#017107

#017627

### DRAGSTER WHEEL CRADLES

Designed to keep front wheels stable during transportation. The wheel cradle stops all left to right movement in the front without securing the front-end of the vehicle. Two molded through-holes allow the wheel cradle to be semi-permanently mounted to the trailer floor.

#017627 **\$179.95 (pair)**

#017570

### PIT RAMPS

Made of durable elastomer construction that features detents, to hold most tire sizes steady, and formed hand holes that allow greater convenience when using.

#017570 **\$197.95 (pair)**

#019883 **\$46.95**

### CHASSIS STABILIZERS

Protect your vehicles sensitive components from excessive wear while traveling. Chassis stabilizers inhibit vertical movement during transportation to stop damage and wear of chassis and suspension components, electronics, struts, springs, torsion bars and on-board computers. All kits come with a 6' hose kit and a gate valve. Simply slide the deflated stabilizer under the most flexible point in the chassis and inflate. Manufactured with a heavy-duty elastic rubber compound and a high strength internal composite support structure.

**Stabilizer with Hose - Rectangular** #017628 **\$274.95**
